Chemische Werke Reichenbach VEB, a former Schering-Konzern plant intends to produce tannin and gallic acid from Chinese galls. Stores on hand amounted to about 600 tons of Chinese galls yielding a 50 to 60 percent substance if processed according to standard methods. While only small quantities of tannin had been processed so far, a considerable increase was planned for the future. The price was scheduled to be about 30 eastmarks per kg.
